

# HIGH TEMPERATURE PROBE WAIVER

To: PreciseCal Services, Inc. Team

Please proceed with calibration of temperature probe ID#/SN# \_\_\_\_\_ at the higher temperatures requested.

I understand that PreciseCal Services, Inc. does not recommend exceeding 400 °C (792 °F) for testing purposes, and that we absolve PreciseCal Services, Inc. of any damages to our probe due to heat stress to probe and possible melting of handle.

I understand that PreciseCal Services, Inc. will take all steps possible to avoid heat damage to probe but may still, through no fault of their own, result in a melted handle. This result will most likely render the probe unusable and require purchase of a new probe.

I further understand that I will still be billed for the calibration service in full and will receive a certificate with any data obtained prior to the melt down event. Any replacement probes will be handled as a separate calibration and billable event.

Please select below:

- This is a onetime waiver.
- Please keep this waiver on file for all future calibrations of this unit until I inform you otherwise in writing.

Company Name: \_\_\_\_\_

Signature of company representative who is authorized to approve waiver required below.

You are signing that you have read the above and understand the risks of moving forward with requesting this type of testing.
